

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

ARIA — These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

- ▲ [button](#), [link](#), and [menuitem](#) elements do not have accessible names. ▼

Contrast — These are opportunities to improve the legibility of your content.

- ▲ Background and foreground colors do not have a sufficient contrast ratio. ▼

Tables and lists — These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

- ▲ Lists do not contain only `` elements and script supporting elements (`<script>` and `<template>`). ▼

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. ▼
Learn more in our guide on [conducting an accessibility review](#).
